ETC Release Note

Gadget II v1.2.1

Installation Instructions

The 1.2.1 version firmware is a standalone release. You must manually install this firmware onto your Gadget II interface or ETC Console I/O cards to resolve the issue when integrating with City Theatrical Multiverse products.

CAUTION: *To install the v1.2.1 firmware and update your Gadget II devices or console I/O Cards, you must have access to an ETC Console (Eos or Cobalt family) or have ETCnomad (Eos or Cobalt) installed on a Windows PC.*

Step 1: Download and Prepare the Update File

1: On a PC, download the ETC_GADGET_IO_Firmware Installer from the product download page.

2: If you are updating via ETC console, transfer the file to the root directory of a USB drive and insert the USB drive into your console.

Step 2: Install the Update File

For Windows PC:

If you are updating via ETCnomad, run the Installer on your PC and follow the on-screen prompts.

For an ETC console:

- For Eos family consoles: Exit to the Eos Configuration Utility (**Browser** > **Exit**) and select **Settings** > **General Settings** > **Software Update**. Select the file on your USB drive and click **Install**.
- For Cobalt family consoles: Exit to System Settings (**Browser** > **Files** > **Exit To System Settings)** and select the Update tab. From the Software Update section, select the file on your USB drive and click **Install**.

Step 3: Update the Gadget II or Console I/O Cards

Note: *If you are updating a Gadget II interface, ensure that it is connected to your ETC console or PC.*

If you are updating using an Eos family console or ETCnomad (Eos):

1: Exit to the Eos Configuration Utility (**Browser** > **Exit**) and select **Settings** > **Maintenance** > **Firmware Update**.

2: From the Firmware Update window, select your Gadget/IO Board module and click **Update**.

If you are updating using a Cobalt family console or ETCnomad (Cobalt):

1: Exit to System Settings (**Browser** > **Files** > **Exit To System Settings**) and select the Update tab.

2: From the Firmware Update section, select your Gadget/IO Board module and click **Update**.

Issues Corrected in v1.2.1

IOCARD-47737 Gadget cuts off RDM responses from City Theatrical Multiverse products

Known Issues Remaining in v1.2.1

No known issues.
